

Title of topic: Predator

Topic Focus: Science- animals, food chains and skeletons

Year 3- Autumn 1

This is the knowledge organiser for our topic. It includes all the learning outcomes, key facts and vocabulary. Please share this with your child to help them develop their knowledge and understanding of our topic.

Key facts

A predator is an animal that hunts, kills and eats each other. An apex predator is the top of the food chain and isn't be hunted by another animal.

Food provides energy for all living things. Energy is needed for life processes and food chains show how energy passes from one plant or animal to another.

Carnivorous plants have adapted to grow in places where soil is thin and has few nutrients.

Key vocabulary:

Adaptation
Ambush
Camouflage
Carnivore
Decomposer
Herbivore
Host
Mammal
Nectar
Nutrient
Omnivore
Stalk
Predator
Prey
Scavenger
Producer
Consumer

Parasites are living things that live in or on another living thing and survive by taking nutrients from the host.

Many animals have a skeleton to support their body, help them move and protect their vital organs.
